

The winners from 2015-2016

IF YOU WERE an ENGINEER - What WOULD YOU DO?

 @leadersaward #leadersaward17

The **Secondary Engineer Leaders Award-London 2017** is now open for entries.

To answer the question “**If you were an engineer, what would you do?**” your students will need to interview engineers about what it means to be an engineer, find a problem, invent a solution, draw it, explain it and send it in. Add a ‘Pitch Letter’ to Engineers explaining what their invention is and who benefits from it and **they** could be a Trophy Winner!

Secondary Engineer LEADERS AWARD

If **your** school would like to be part of this extraordinary event, please contact info@leadersaward.com for more information, go to www.leadersaward.com and sign-up to our newsletter, follow us on Twitter via **@Leadersaward** and use **#leadersaward17** or do all three!

Barony Hall Exhibition 2016

PUPILS TO PITCH THEIR INVENTIONS...

Tell us all about your design.

The Pitch should tell us things like...

- What problem does the invention solve?
- Why do they think it is a problem?
- Who or what benefits from the invention?

...as well as telling us a few things about themselves and the engineers they interviewed, with all of the information included within the framework of a standard letter format.

2016 Scottish Engineering Special Leaders Award Winners

These Pitch letters, with age-based word count requirements, provide teachers with the opportunity to explore pupils'...

- Creative and independent thought.
- Factual subject knowledge.
- Transcription skills.
- Composition skills.
- Writing for a purpose.
- Writing for an audience.
- Use of appropriate vocabulary.
- Use of persuasive language.
