

5 – 19 year old Healthy Child Programme School health profile

The aim of the profile is to identify the public health needs of the school population in order to prioritise and plan interventions from the School Health Service. This also enables the School Health Service to work in partnership with other health professionals who are working in your school. Your school nurse will meet with an appropriate member of staff to discuss this health profile and the support the service can offer.

Please complete the profile electronically by Friday 18th October and send to public.health@haringey.gov.uk.

Date profile completed: *Enter text.*

Name of person completing profile: *Enter text.*

Job role: *Enter text.*

1. School details

a) Name of school: *Enter text.*
